

Standard Leak Test Machine with Interchangeable Fixtures

TQC Series 40

TQC have recently developed a standard leak testing bench with integral plc control, capable of housing interchangeable fixtures for testing of different variants of sealed bottles. This system also includes a fixture rotation for the testing of a float switch and a camera system for label or part detection.

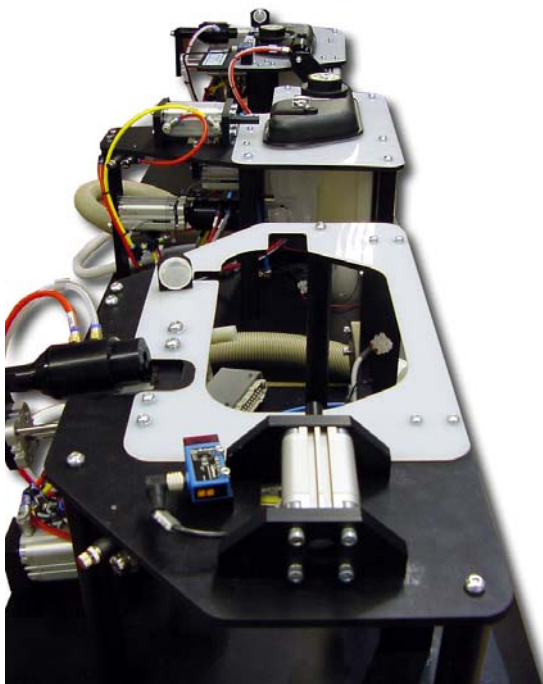

The unit incorporates:

- Standard aluminium extrusion bench
- Automatic lifting guard door
- Capable of testing 5 variants of expansion tank and more in the future
- Interchangeable fixtures each complete with fully automatic sealing mechanisms
- Integrated label inspection
- Tilt mechanism for turnover of the part for float switch testing.
- Built in Nolek S9 leak test instrument
- PLC control system

The style of equipment can be configured for either over-pressure, vacuum or dosing applications.

If you are currently considering a leak test application contact TQC to discuss your requirements
